

Investment Opportunity

Mataranka Region

Greenview Farms stands at the forefront of agricultural excellence in the Northern Territory – Australia’s untapped growth frontier. As one of the largest producers of melons in the NT, they proudly supply over 20,000 tonnes annually to domestic markets. But their ambitions stretch well beyond crop yields.

With an established farming production at Roper Plains and recent acquisition of the Larrimah Agricultural Development, Greenview Farms is not just growing produce – they are building a region. They have a strong commitment to invest locally, employ within the region and develop strategically.

Mataranka is known for its production strength and with the inclusion of Larrimah Agricultural Development the region is set for a new growth phase.

Production at scale is occurring and identified investment opportunities include:

- Accommodation – Short and Long Term
- Logistics hubs including fuel, freight and cold chain storage
- End to End transport solutions for a growing supply chain

Northern Territory Government

About the region

The Northern Territory has a diverse and well-established agriculture sector with efficient supply chains and offers significant opportunity for development and growth.

The Mataranka region is known for its diverse agricultural industries and growth potential. The area is particularly suited to mango and melon production and is serviced by strategic road infrastructure to the rest of Australia and is close to rail links. Its climate and rainfall make it a prime area for irrigated agriculture and cattle production.

With established agricultural producers it is well placed for further growth and development.
